

SHEET METAL INDUSTRIES

January to December 1981 INDEX TO VOLUME 58

A					
A new light on sub-contracting	452	Cold roll forming, Review of tooling design	568	Estimating for presswork — a fully computerised system	426
A positive approach to the introduction of modern techniques	121	Comparison of methods of descaling, A	826	F	
Adhesives in the motor car industry, Structural	902	Continuous production of panels	980	Fastener manufacture, A tighter grip on spring	139
Alloy design of dual-phase steel	422	Conveyor systems, Overhead	368	Fasteners, Developments in stainless steel	56
American coil-cutting systems to be produced in United Kingdom	237	Correct choice of 'stainless' electrode for high-temperature (creep) applications	226	Fine blanking technique, Effective application of the	961
Atlas Sheet Metal Center, Austria, 'Three pillars to success'	472	Curved-line folding of sheet metal	527	Fine blanking, Specialist service for	967
Automan 82 preview	362	Cutting-drawing-forming and bending with steel-bonded titanium carbide	270	Finite element method and sheet metal forming, The	561
Automated production of a large panel press, Some aspects of	438	D		Flying cut-off system, Building products manufacturer invests in new	394
Automatic spinning — a revolution in the making	515	Daimler limousine	716	Forming and drawing of sheet steel	784, 913
B		Deep-drawing, Water-cooled punch takes the heat out of	296	Forming limit diagram, A new method in the determination of	284
Banding lines designed for stainless steel	474	Descaling, A comparison of methods of	826	Fourth European Machine Tool Exhibition, Hannover Preview	681
The Birmingham Mint — making money, pressings and history	129	Development in electrochemical metal recovery technique in electroplating, New	918	France, Coil coating industry of	949
Blind fasteners — types, practice, applications and advantages	318	Developments in the hydraulic press industry	864	H	
Blanking, Hydraulics move into	872	Developments in stainless steel fasteners	56	Hand-built automobiles — a connoisseur class of vehicle (Daimler)	716
Book Reviews	79, 750	Developments in tinplating	819	Haulick + Roos Werkzeugmasch GmbH	660
British Contract Presswork Association	172, 555, 647	Die making, CAD Centre services for tool and	540	Health and safety in sheet metal shops	558
British Steel Corporation offers technical assistance to industry	601	Dieffenbacher, J GmbH & Co	649	Hydraulic locking secures improved production	45
Building a stainless reputation	27	Dies, Equipment for rapid changing of	282	Hydraulic method of tightening, The tightening of heavy bolted joints — advantages of the	214, 386
Building products manufacturer invests in new flying cut-off system	394	Dual-phase steel, Alloy design of	442	Hydraulic press industry, Developments in the	864
C		E		Hydraulic press users, New code for	958
CAD Centre services for tool and die making	540	Economic advantages of applying measuring grids in sheet metal forming, The	306	Hydraulics in press tools, Use of	867
CNC and the metalforming industry	573	Economic production of high-grade sheet metal components in oil-hydraulic rubber-pad drawing presses	278	Hydraulics move into blanking	872
CNC to sheet-metal-working machines, The application of	372	Effective applications of the fine blanking technique	961	I	
Code for hydraulic press users, New	958	Electrochemical metal recovery technique in electroplating, New development in	918	Improved production costs with new range of shears	512
Coil coating industry of France	949	Electroplating, New development in electrochemical metal recovery technique in	918	Improved valve design gives faster response	102
Coil coating, Water-based paints for	710	Equipment for rapid changing of dies	282	Industrial robots in sheet-metal working	359
Coil-cutting system to be produced in the United Kingdom, American	237			Influence of temperature on the material parameters in the forming of sheet steel	191
Coil lines, New facility to design and build	205				
Cold-forming tools with a low noise factor	109				

SHEET METAL INDUSTRIES

January to December 1981 INDEX TO VOLUME 58

A		
A new light on sub-contracting	452	
A positive approach to the introduction of modern techniques	121	
Adhesives in the motor car industry, Structural	902	
Alloy design of dual-phase steel	422	
American coil-cutting systems to be produced in United Kingdom	237	
Atlas Sheet Metal Center, Austria, 'Three pillars to success'	472	
Automan 82 preview	362	
Automated production of a large panel press, Some aspects of	438	
Automatic spinning — a revolution in the making	515	
B		
Banding lines designed for stainless steel	474	
The Birmingham Mint — making money, pressings and history	129	
Blind fasteners — types, practice, applications and advantages	318	
Blanking, Hydraulics move into	872	
Book Reviews	79, 750	
British Contract Presswork Association	172, 555, 647	
British Steel Corporation offers technical assistance to industry	601	
Building a stainless reputation	27	
Building products manufacturer invests in new flying cut-off system	394	
C		
CAD Centre services for tool and die making	540	
CNC and the metalforming industry	573	
CNC to sheet-metal-working machines, The application of	372	
Code for hydraulic press users, New	958	
Coil coating industry of France	949	
Coil coating, Water-based paints for	710	
Coil-cutting system to be produced in the United Kingdom, American	237	
Coil lines, New facility to design and build	205	
Cold-forming tools with a low noise factor	109	
Cold roll forming, Review of tooling design	568	
Comparison of methods of descaling, A	826	
Continuous production of panels	980	
Conveyor systems, Overhead	368	
Correct choice of 'stainless' electrode for high-temperature (creep) applications	226	
Curved-line folding of sheet metal	527	
Cutting-drawing-forming and bending with steel-bonded titanium carbide	270	
D		
Daimler limousine	716	
Deep-drawing, Water-cooled punch takes the heat out of	296	
Descaling, A comparison of methods of	826	
Development in electrochemical metal recovery technique in electroplating, New	918	
Developments in the hydraulic press industry	864	
Developments in stainless steel fasteners	56	
Developments in tinplating	819	
Die making, CAD Centre services for tool and	540	
Dieffenbacher, J GmbH & Co	649	
Dies, Equipment for rapid changing of	282	
Dual-phase steel, Alloy design of	442	
E		
Economic advantages of applying measuring grids in sheet metal forming, The	306	
Economic production of high-grade sheet metal components in oil-hydraulic rubber-pad drawing presses	278	
Effective applications of the fine blanking technique	961	
Electrochemical metal recovery technique in electroplating, New development in	918	
Electroplating, New development in electrochemical metal recovery technique in	918	
Equipment for rapid changing of dies	282	
Estimating for presswork — a fully computerised system	426	
F		
Fastener manufacture, A tighter grip on spring	139	
Fasteners, Developments in stainless steel	56	
Fine blanking technique, Effective application of the	961	
Fine blanking, Specialist service for	967	
Finite element method and sheet metal forming, The	561	
Flying cut-off system, Building products manufacturer invests in new	394	
Forming and drawing of sheet steel	784, 913	
Forming limit diagram, A new method in the determination of	284	
Fourth European Machine Tool Exhibition, Hannover Preview	681	
France, Coil coating industry of	949	
H		
Hand-built automobiles — a connoisseur class of vehicle (Daimler)	716	
Haulick + Roos Werkzeugmasch GmbH	660	
Health and safety in sheet metal shops	558	
Hydraulic locking secures improved production	45	
Hydraulic method of tightening, The tightening of heavy bolted joints — advantages of the	214, 386	
Hydraulic press industry, Developments in the	864	
Hydraulic press users, New code for	958	
Hydraulics in press tools, Use of	867	
Hydraulics move into blanking	872	
I		
Improved production costs with new range of shears	512	
Improved valve design gives faster response	102	
Industrial robots in sheet-metal working	359	
Influence of temperature on the material parameters in the forming of sheet steel	191	

Institute of Sheet Metal Engineering	26, 92, 174, 268, 352, 422, 504, 642, 791, 860, 946
International Congress on Metals Engineering	644
